

## Subscription Requests

### Free Subscriptions

Individuals requesting subscriptions, or wishing to change their address, should contact MTsubscriptions at:

[AssociationManagement@microscopy.org](mailto:AssociationManagement@microscopy.org)

### Subscription Policies

- Microscopists in the United States and Canada are eligible for gratis mail subscriptions.
- Microscopists in the rest of the world can subscribe to the print edition for \$60US.
- Microscopists in the rest of the world are eligible for gratis email alerts to the digital edition.
- Microscopists anywhere in the world may view the digital edition at the *Microscopy Today* website shown at the bottom of this page.

### Digital Edition

- The digital edition is an exact replica of the print edition, advertisements and all.
- Features include dynamic pages with live webpage and email links, a word-level search function, and variable page magnification to enlarge both text and figures.

*Microscopy Today* has articles about:

- Innovative instruments and methods
- Applications in various fields
- Hints and tips for novices and experts
- Protocols in microscopy and microanalysis
- Microscopy facilities descriptions
- Meetings and courses
- Success stories in microscopy education
- Historical microscopy and pioneers
- Industry news and product news
- Humorous situations
- Opinions of our readers

# *In-situ* microscopy – uncompromised

There is always more to see when studying high speed reactions. That's why at Gatan we build large format cameras with unparalleled temporal resolution to push the boundaries of *in-situ* electron microscopy.

## OneView™

Use only ONE camera to capture high quality 16 megapixel still images AND video in all of your transmission electron microscope (TEM) applications.

- Always have a “live” experience with 25 fps at full 4k x 4k resolution
- 200 fps at 1024 x 1024 resolution

[www.gatan.com/oneview](http://www.gatan.com/oneview)

**2015 Microscopy Today Innovation Award**  
*One of the ten best microscopy innovations*

[www.gatan.com/K2IS](http://www.gatan.com/K2IS)

## K2® IS

Resolve dynamic details *in-situ* with the fastest 4k x 4k direct detection camera available.

- Frame rates up to 1600 fps – sub-ms time resolution
- Highest available DQE provides best signal-to-noise ratio – every image is useful

# STELLAR RESULTS AT THE ATOMIC SCALE

ARM-200F • ARM-300F  
Atomic Resolution TEM

- Highest resolution commercially-available S/TEM
- 200kV and 300kV models
- $C_s$  correctors – innovative options
- Cold FEG
- Superior SDD technology
- Ultimate stability
